Monetary Identity

*How your relationship to resources impacts your everyday life
with Mickey Mikeworth*

As individuals grow into higher earning potentials, the unspoken rules for success change. Implied meanings that women may not be aware of and personal positioning as a whole person becomes just as important as a written resume. Many people are left to figure out how to bridge the gap between where they are now and where they want and need to go. We'll also explore how economics play a role with those you serve and how you serve them. The economic class plays a big role in how participants make their way through life and your programs.
